In this role, you will play a crucial part in managing the IT networking system of our Automotive division, ensuring its continuous improvement. Reporting to the global IT Manager Network & Datacenter, you will be responsible for various tasks related to networking, security, and telecom equipment.

Main responsibilities:

- Support the design, optimization, implementation and monitoring activities of Networking/Security and Telecom equipment such as Routers, Switches, IPS/ID, Data Circuits, and Load Balancers
- Maintain Network and Security Standards, Configuration Compliance, Patch management, Cert review, and Roadmap planning
- Implement Disaster Recovery and Business Continuity for key network systems
- Contribute to the development of corporate and divisional network and telecom strategy and tactical plans
- Set up system documentation and update operational standards and procedures
- Collaborate within an international support team
- Provide high-level technical support to the operations team
- Stay informed about new technologies and trends, proposing operational support technologies, tools, and techniques

How to convince us

- High school diploma with technical orientation (duration of 5 years)
- Minimum 5 years of experience in systems administration and/or design; managing and troubleshooting VoIP networks; Routers and Switch design and support in a large global environment
- Extensive experience in enterprise data center or a multi-site environments and with large remote office routing and switching
- Consultative/partner approach with clients and work with minimal supervision on difficult assignments
- Ability to lead and manage projects in a global and multi-site organization
- Excellent knowledge of English
- Cisco, HP, Palo Alto and ITIL certifications are considered a plus
- Availability to travel

Good communication skills, accountability, proactivity, autonomy in organizing workload, ability to work under pressure and efficient management of critical situations complete the profile.

What we offer

- Individualized new-hire training plan, flexible working hours, overtime compensation, working time account, opportunity to work from home, free on-site parking, company canteen, supplementary pension plan, access

to the Corporate Benefits web platform and discounts with local businesses

- Opportunity for professional and personal growth in a fast-paced environment with challenging objectives
- Consistent access to both internal and external training programs for personal and organizational development
- Certified as a Famiglia&Lavoro Audit-approved entity by the Autonomous Province of Bolzano
- The opportunity to work within a modern, technologically advanced production plant while experiencing the values of an international family-owned business
