

The Röchling Group has been shaping industry. Worldwide. For more than 200 years. We transform the lives of people every day with our customized plastics: they reduce the weight of cars, make medication packaging more secure and improve industrial applications. Our workforce of 11,737 people is located in the places where our customers are – in 92 locations in 25 countries.

It is time for a new challenge. And time to arrive where you want to be. We have grown steadily, together as a team. Would you like to grow too? For us and with us? If you answered yes, we have career opportunities for you. Do you have what it takes to spur game-changing innovation? Do you crave being a part of the solution, while enjoying training and learning opportunities? Then get ready to join the Röchling Automotive team and become part of the next chapter in our history. In our Duncan location we are looking for an

EHS Specialist

Where we need you

- Responsible for reviewing, evaluating, and analyzing the work environments and designing programs and procedures to control, eliminate, and prevent disease or injury caused by chemical, physical, and biological agents or ergonomic factors.
- Responsible for championing the health and safety programs and acting as a change agent to positively influence the company culture by promoting a safe, healthy, productive working environment.
- Accountable for conducting inspections and enforcing adherence to laws and regulations governing the health and safety of individuals.
- Responsible for implementation and advancement of Environmental Management System (EMS) designed in accordance with and capable of achieving registration to ISO 14001 Standard.
- Responsible for developing written programs, training materials to facilitate compliance with safety and environmental regulatory requirements and which promotes awareness, and to facilitate compliance and the continuous improvement process.
- Responsible for the identification of technical and/or legal issues that impact, or potentially impact, the organization and the formulation of plans and programs to achieve the desired results. Recommend and advise management regarding the best means for complying with standards, reducing or controlling hazards and for

making production activities safe, efficient and compliant.
